DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a method of scheduling a vehicle, classified in class 705, subclass 1.
 - II. Claims 20-31, drawn to a method of ordering goods or service items, classified in class 705, subclass 1.
 - III. Claims 32-43, drawn to a method for delivery of a package, using route information, classified in class 705, subclass 1.
 - IV. Claim 44, drawn to a method for calculating charges, classified in class 705, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions all have different functions. Invention I is for scheduling a vehicle to be used, Invention II is for scheduling the delivery of ordered goods, Invention III is delivering a package using route information, and Invention IV calculates charges for delivery.
3. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Inventions II, III or IV, restriction for examination purposes as indicated is proper.

Art Unit: 3629

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
